

Protect your calls from blocking and labeling

Are your calls at risk of being wrongly treated as unwanted robocalls? Take control of your identity and protect your phone numbers from being mislabeled as scam and spam.

Defend your brand by establishing a verified calling identity

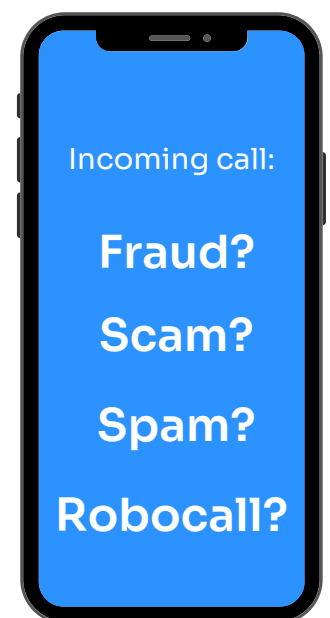

Establish your verified identity status to take control over the consistent presentation of your calling name and prevent improper classification as a scam or fraud caller.

Connect with more customers by improving calling reputation

Register your IntelPeer and 3rd party phone numbers across the analytic engines and app providers serving all the major U.S. wireless carriers to correct misleading labels in the caller ID display and prevent erroneous call blocking.

Proactively identify and address reputation risks

Ongoing monitoring and visibility into data, with weekly updates and automated remediation when risks emerge.

On-demand visibility of reputation & performance

Automated redress of improper labeling

One source for ongoing visibility and control across carriers, analytic engines, and apps

Our comprehensive solution alleviates the time and resources needed to manage multiple relationships and updates. IntelPeer is your single point of contact to address negative number labeling, and achieve more productive customer interactions.
